

M 6.0, 57 km NE of Bandar-e Lengeh, Iran

Origin Time: 2022-07-01 23:25:14 UTC (Sat 03:55:14 local) Location: 26.8992° N 55.3207° E Depth: 10.0 km

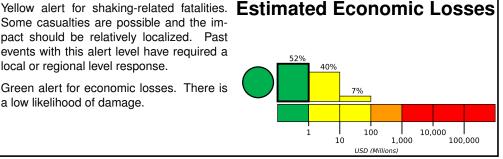

PAGER Version 5

Created: 1 day, 0 hours after earthquake

Some casualties are possible and the impact should be relatively localized. Past events with this alert level have required a local or regional level response.

Green alert for economic losses. There is a low likelihood of damage.

Estimated Population Exposed to Earthquake Shaking

Structures

Overall, the population in this region resides in structures that are vulnerable to earthquake shaking, though resistant structures exist. The predominant vulnerable building type is low-rise nonductile concrete frame with infill construction.

Historical Earthquakes

Date	Dist.	Mag.	Max	Shaking
(UTC)	(km)		MMI(#)	Deaths
1977-03-21	128	6.7	VII(7k)	167
1990-11-06	148	6.6	IX(5k)	22
2003-12-26	367	6.6	VII(72k)	26k

Recent earthquakes in this area have caused secondary hazards such as landslides that might have contributed to losses.
